The Saturn S-series was a family of compact cars from the Saturn automobile company of General Motors. Saturn pioneered the brand-wide "no haggle" sales technique. The automobile platform, the Z-body, was developed entirely in-house at Saturn, and it shared very little with the rest of the General Motors model line. It implemented a spaceframe design, which had been used on some Pontiacs ...

The Camshaft Position Sensor is an electronic device used in an engine to record the rate at which the camshaft is spinning. This information is used by the Engine Control Module to control ignition and fuel injection. The camshaft position sensor senses the retraction of camshaft (intake) to identify a particular cylinder.

As a result, damage to major engine components could occur. Using both the CHT sensor and fail-safe cooling strategy, the PCM prevents damage by allowing air cooling of the engine and limp home capability. The Diagnostic Trouble Code (DTC) indicates an engine overheat condition was detected by the Cylinder Head Temperature Sensor.

### P1299 FORD Code Cylinder Head Temperature Sensor Detected ...

Personally I think 40 years of proven service is worth alot more to me than having the latest barely proven technology. My '96 Ram got 18 mpg with its 360 automatic,it was a 4X4 and fully loaded. I think mileage has more to do with driving location and habits,than if you have the latest in engine design or not.
