NATO is developing new forms of warfare to wage a “battle for the brain,” as the military alliance put it. The US-led NATO military cartel has tested novel modes of hybrid warfare against its self-declared adversaries, including economic warfare, cyber warfare, information warfare, and psychological warfare.

Brain Age is designed to be played a little each day, similar to the Nintendogs titles and Animal Crossing: Wild World. The Nintendo DS is held on its side, with the touch screen on the right for right-handed people and the left for left-handed people. The game is entirely touch and voice-controlled – the player either writes the answer to the puzzle on the touch screen or speaks it into the ...
