In addition to CO₂ release, agriculturally induced deforestation is the main cause of biodiversity loss worldwide. It is also responsible for 70–80 % of all human water withdrawals (water scarcity is becoming more widespread in many parts of the world) and is a significant cause of water pollution (Reference Jägerskog and Jønch Clausen 5). The use of fertilisers, manure and N-fixing ...

Pound for pound, the comparative impact of CH₄ is 25 times greater than CO₂ over a 100-year period. 1. Globally, 50-65 percent of total CH₄ emissions come from human activities. 2, 3 Methane is emitted from energy, industry, agriculture, land use, and waste management activities, described below.

Overview of Greenhouse Gases | US EPA

In a highly detailed survey, for example, slope classes of 0 to 1 percent and 1 to 3 percent would be named "level" and "nearly level," respectively. Slope length is rarely used directly in soil mapping because its range across all the polygons of a soil map unit is highly variable. Furthermore, natural slope lengths are commonly ...
