A summary of everyday life in the Industrial Era ...

The Industrial Age is a period of history that encompasses the changes in economic and social organization that began around 1760 in Great Britain and later in other countries, characterized chiefly by the replacement of hand tools with power-driven machines such as the power loom and the steam engine, and by the concentration of industry in large establishments. While it is commonly believed that the Industrial Age was supplanted by the Information Age in the late 20th century, a view that has

Industrial Age - Wikipedia

With its far-spreading, factorylike environment, nineteenth-century Chicago was a place where writers went to see the machine-age future in all its splendor and squalor. Chicago was the international capital of meatpacking, and in its sprawling stockyards district it was inventing a new way of making things—assembly-line production—that would transform the world.
