It can help provide some insight, but it is not absolute. First 3 Months of Recovery Are Meaningful. Stroke rehabilitation often begins within the first 24-48 hours after stroke. As the brain is rapidly trying to heal itself after injury, it enters a heightened state of plasticity where recovery happens more quickly.

Stroke Recovery Prognosis: What Will the Outcome Be?

Thank you very much for the article. This will really help me with my final year project. I just have one query. You mentioned that “ two stroke engines are more reliable in operation compared to 4 stroke engine”, I have been going through a few articles on two stroke vs four stroke engines and they all say that 4 strokes are more reliable than 2 stroke engines.

Why 2-stroke Main Engines are Used over 4-stroke on Ships?
