Sugar Solution

The solution becomes saturated after as much sugar dissolves in the water as possible. Because sugar is a non-ionic compound, it does not dissolve into ions when added to water. Additionally, sugar tends not to release H or OH ions when it dissolves in water, so it does not alter the acidic or alkaline properties of the solution.

What is the PH of a Sugar Solution? | Sciencing

Sugar solutions or "syrups" are used extensively in canning, and sometimes referred to as "heavy" or "light" syrups. The terms heavy and light are commonly used in two different ways. We refer to weight when we say that an adult is heavier than a child. On the other hand, something else is alluded to when we say that one syrup is heavier than ...
